

The right doctor is just a few clicks away

The Find A Doctor tool makes finding the right provider easy.

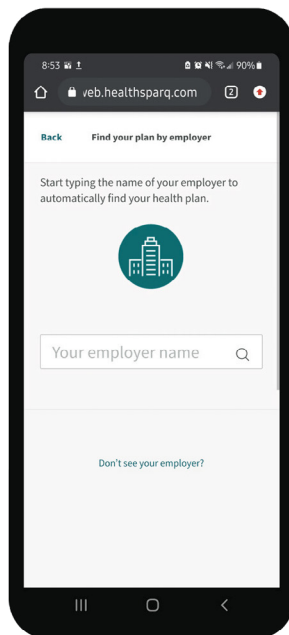

Information is power. The Find A Doctor tool puts that information at your fingertips. You can use it to quickly find the doctors and hospitals included in your network, so you can make more informed choices when choosing your health care.

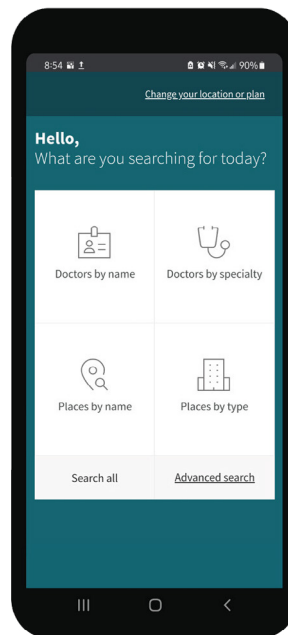

Scan to find a doctor.

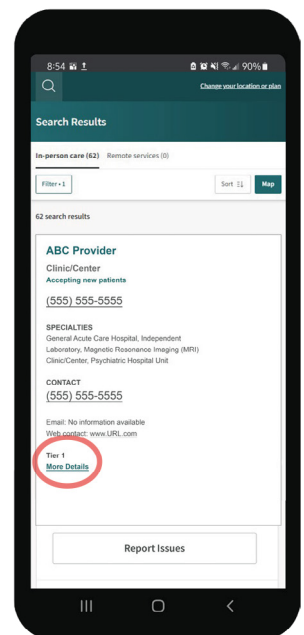

1 Go to alliance-wps.com.

2 Enter your location, then enter The Alliance and WPS Statewide Networks.

3 Search for providers. You can search by doctor name, doctor specialty, facility name, or facility type.

4 Review your results. You will be able to see which tier a provider is in, as well as additional information about the provider.

For providers outside of Wisconsin, visit wpshealth.com/customers/group/ to log into your Customer Portal click on the appropriate provider website link.

Providers can leave or enter the network at any time. It is recommended that you check the network status of your provider on a regular basis. Your network coverage options may vary.
